About us

2+2 International Math School, the biggest educational network of science establishments in Poland (over 80 branches). For the past few years we have also spread to other countries, among others to the Czech Republic, Hungary, Romania, Serbia, Bosnia and Herzegovina and Croatia.

Our establishments offer math support to pupils on various levels – those with educational problems and the gifted ones, preparing them to Olympiads or supporting their development. The children may benefit from our expertise from the beginning of primary school to the end of high school!

Where?

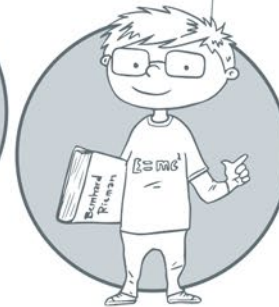

Over 80 branches in Poland and establishments in other countries.

For whom?

Children with educational problems

Little geniuses

Children preparing to Olympiads

From primary school pupils up to high school students

About us

Digital Academy is a franchise network of educational establishments which spread widely understood IT knowledge to youths. Within just three years, the network expanded to 30 establishments throughout the country.

The offer comprises specially designed and constantly updated educational scenarios that teach children and teenagers basic skills in programming and creating video games.

Digital Academy is targeted mainly at children aged 6-17.

Where?

Almost 30 establishments throughout the country

For whom?

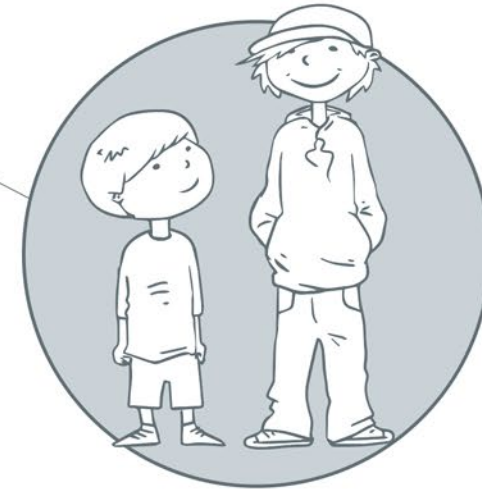

Enthusiasts for IT

Games creation

3D graphics and digital image

Children aged 6-17
